

Hands-on AI programs for *students, families, and educators*, run alongside schools.

When AI can make almost anything, students need to know what's worth making, whether it's good, and how to finish it. Every program builds three skills: **agency**, **taste**, and **craft**, the skills that matter most now that AI can produce the rest.

OUR FOUNDING TEAM COMES FROM

FOR STUDENTS

<u>Website & Portfolio Workshop</u>	Students use AI tools to build a live website: high schoolers make a college portfolio of work they have already done, and younger students launch a site for their own idea.	1-2 days Middle school High school In-person	RUN WITH SCHOOLS
<u>5-Day Product Intensive</u>	Students choose a real problem, build and launch a real product with AI tools, and pitch it to entrepreneurs and investors.	5 days Middle school High school In-person	RUN WITH SCHOOLS
<u>School-Year Mentorship</u>	One project, taken from idea to a real company, with weekly mentor check-ins and a milestone ladder.	Middle school High school Hybrid One-on-one	FAMILIES ENROLL DIRECTLY

FOR EDUCATORS / EDUCATION CONFERENCES

[Teacher training](#)

Hands-on AI for teachers and curriculum leads, built around their own classes: planning, materials, and classroom tools, with their judgment in charge. Formats range from a single session to school-wide training.

FOR FAMILIES & COMMUNITIES

[Community dialogues](#)

Information-sharing sessions for parents, boards, and school communities on AI in the future of education and work, and what it means for students.

WHAT WE'VE RUN Every program teaches up to 20 AI tools: chatbots, coding agents, media generation, and co-working tools.

HONG KONG · SUMMER 2025

5-Day Product Intensive

- Real problem and user → market research → build → launch → demo day to parents and investors.

Case: a ten-year-old new to coding built a sign-language-to-speech app for his deaf cousin.

INTERNATIONAL SCHOOL OF BEIJING

Product Intensive & Parent Talk

- 5-Day Product Intensive
- Parent information series
- One-on-one mentorship

Launched: an all-in-one productivity tool; a student entrepreneur and investor matching platform.

SCHWARZMAN COLLEGE, TSINGHUA

Hands-on AI for staff

- AI training for a large group of staff
- Built around their own work
- Real-world use, within the college's approved AI models

Case: a pronunciation coach for Chinese-language teachers' students.

Bring Arena to your school.

Every program above can be brought to your campus and shaped around your calendar, curriculum, and students. We plan it with your team, and your teachers keep the materials. Pricing is determined on a case-by-case basis.
