AI tools that work on *school networks in China*

Chinese AI services that teachers and students can usually reach without extra setup, grouped by job. All of them are Chinese-run services on Chinese domains. Access varies by school network, so test each one before class.

ASK, WRITE, AND RESEARCH

Kimi Moonshot AI	Research, writing, slides, and simple websites. Log in with WeChat or Google.	kimi.com or kimi.ai
DeepSeek 深度求索 DeepSeek	Reasoning, math, writing, and coding help	chat.deepseek.com
Doubao 豆包 ByteDance	Everyday questions, writing, and voice chat	doubao.com
Qwen 千问 Alibaba	Writing, research, and document reading	qianwen.com
Yuanbao 腾讯元宝 Tencent	Questions, writing, and search with sources	yuanbao.tencent.com
Wenxin 文心 Baidu	Questions, writing, and search	wenxin.baidu.com
Zhipu Qingyan 智谱清言 Z.AI (Zhipu)	Writing and study help, with a learning mode	chatglm.cn
Metaso AI Search 秘塔AI搜索 Metaso	Research with cited sources	metaso.cn

IMAGES, VIDEO, AND DESIGN

Jimeng AI 即梦AI ByteDance	Images, posters, and short videos	jimeng.jianying.com
Kling AI 可灵AI Kuaishou	Video and image generation	klingai.kuaishou.com
Hailuo AI 海螺AI MiniMax	Short video generation	hailuoai.com
LiblibAI 哩布哩布AI LiblibAI	Image generation and style models	liblib.art

BUILD WEBSITES, APPS, AND CODE

TRAE 国内版 ByteDance	AI coding editor: describe it, then build it	trae.cn
Qoder CN Alibaba (formerly Tongyi Lingma)	AI coding assistant	qoder.cn
Baidu Comate 文心快码 Baidu	AI coding assistant	comate.baidu.com
CodeBuddy 腾讯云代码助手 Tencent	AI coding assistant	codebuddy.cn

USUALLY NOT AVAILABLE WITHOUT EXTRA SETUP

ChatGPT, Claude, Gemini (personal accounts), Perplexity, Midjourney, and Cursor do not officially serve mainland China. Websites published on **vercel.app** addresses are often blocked as well, so publish student work to an address your school can open.

IF YOUR SCHOOL USES MICROSOFT 365

Microsoft 365 Copilot is not available on the China version of Microsoft 365 (operated by 21Vianet). Schools on a global Microsoft 365 setup should check their own license with IT.

BEFORE ANY CLASS

- Test each tool on the **student** network, not only the staff network.
- Keep a backup: a phone hotspot, or a second tool that does the same job.
- Use placeholder data. No real student names or records in any tool.
- Agree on accounts and logins with your IT team before students sign up.

STUDENTS AND AGE RULES

- Most of these services say they are mainly for adults and require **guardian consent for users under 18**; several add extra steps for under-14s.
- China's Personal Information Protection Law treats under-14s' personal information as sensitive and requires guardian consent (Articles 28 and 31).
- Vidu is 18+ only and is left off this list. Claude requires users to be 18+; ChatGPT requires 13+ with parent permission under 18.
